Sales Analysis Assignment

PivotTable analysis, visualization, and CRISP-DM reflection

Submission Item 1: Sales by Country

PivotTable: Sum of Sales by country and product

Sum of Sales	Column Labels		
Row Labels	Montana	Paseo	Grand Total
Canada	$ 2,711,919.03	$ 7,611,520.99	$ 10,323,440.02
France	$ 3,527,382.37	$ 5,597,751.06	$ 9,125,133.43
Germany	$ 3,566,044.37	$ 5,229,814.74	$ 8,795,859.11
Mexico	$ 1,941,329.31	$ 7,627,731.39	$ 9,569,060.70
United States of America	$ 3,644,126.80	$ 6,944,325.77	$ 10,588,452.57
Grand Total	**$ 15,390,801.88**	**$ 33,011,143.95**	**$ 48,401,945.83**

Question 1

The United States generated the highest combined sales for Montana and Paseo.

Question 2

The United States generated approximately **$10,588,452.57** in combined sales for these two products.

Submission Item 2: Sales Over Time

Monthly sales for the United States during 2014

Sum of Sales	Column Labels	
Row Labels	United States of America	Grand Total
2014	$ 19,905,415.34	$ 19,905,415.34
January	$ 1,346,026.49	$ 1,346,026.49
February	$ 1,332,890.66	$ 1,332,890.66
March	$ 1,789,974.47	$ 1,789,974.47
April	$ 1,616,624.48	$ 1,616,624.48
May	$ 1,949,249.35	$ 1,949,249.35
June	$ 1,323,610.80	$ 1,323,610.80
July	$ 2,308,798.13	$ 2,308,798.13
August	$ 2,007,266.12	$ 2,007,266.12
September	$ 1,429,253.48	$ 1,429,253.48
October	$ 1,503,072.26	$ 1,503,072.26
November	$ 1,566,757.01	$ 1,566,757.01
December	$ 1,731,892.10	$ 1,731,892.10
Grand Total	$ 19,905,415.34	$ 19,905,415.34

Question 3

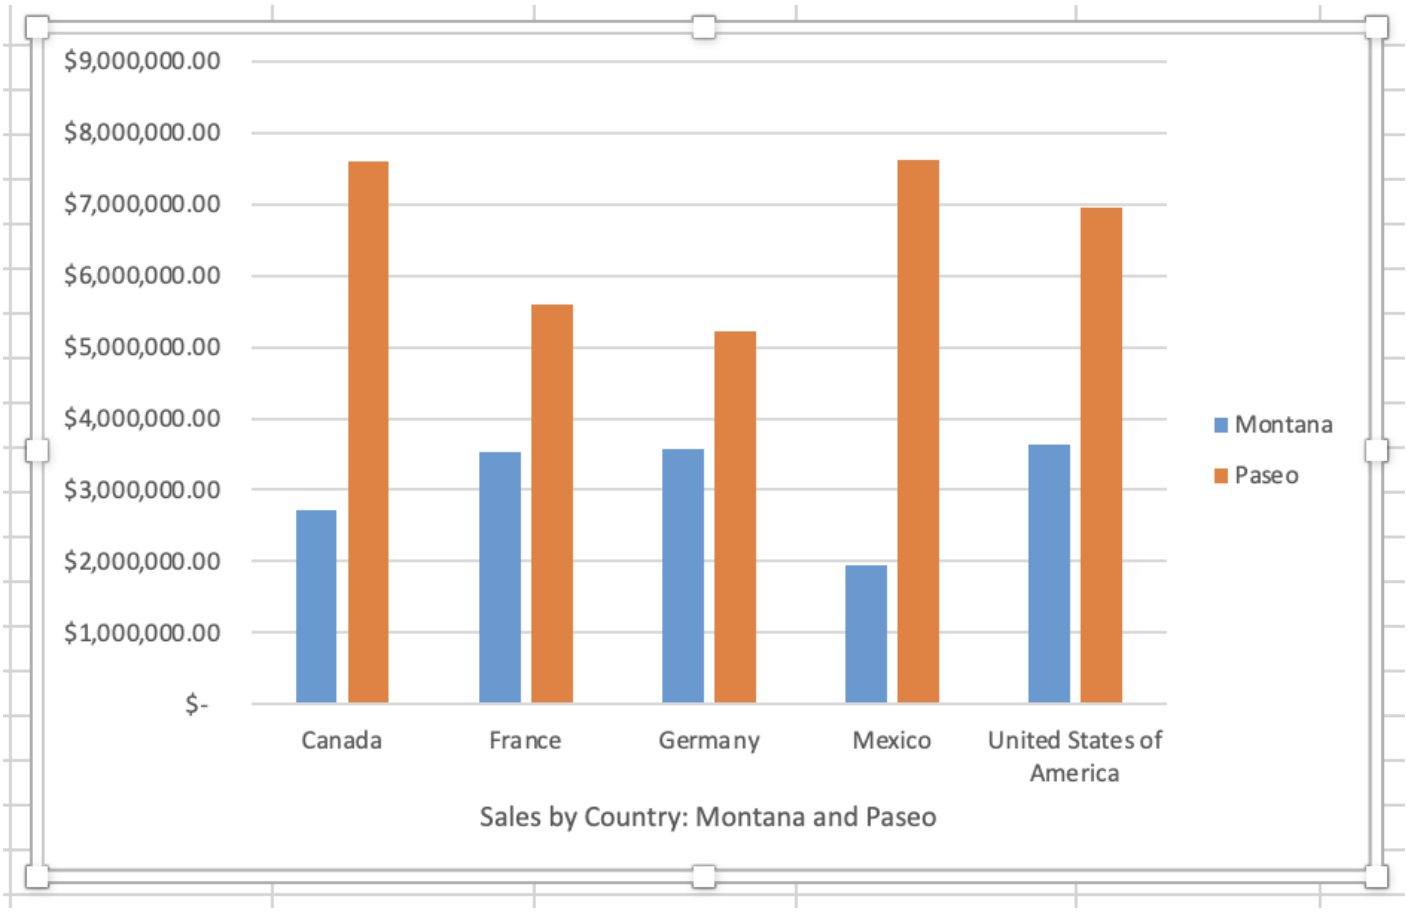

July had the highest sales, at **$2,308,798.13**.

Question 4

Sales fluctuate month to month, rising overall from January to May before dipping in June. They peak in July, then generally fall through September and recover somewhat toward December.

Submission Item 3: Visualization

PivotChart: Sales by Country: Montana and Paseo

Question 5

Paseo sales are higher than Montana sales in every country shown. Paseo is strongest in Mexico, while Montana is strongest in the United States.

Question 6

I chose a clustered column chart because the side-by-side bars make it easy to compare the two products within each country.

Submission Item 4: Your Own Insight

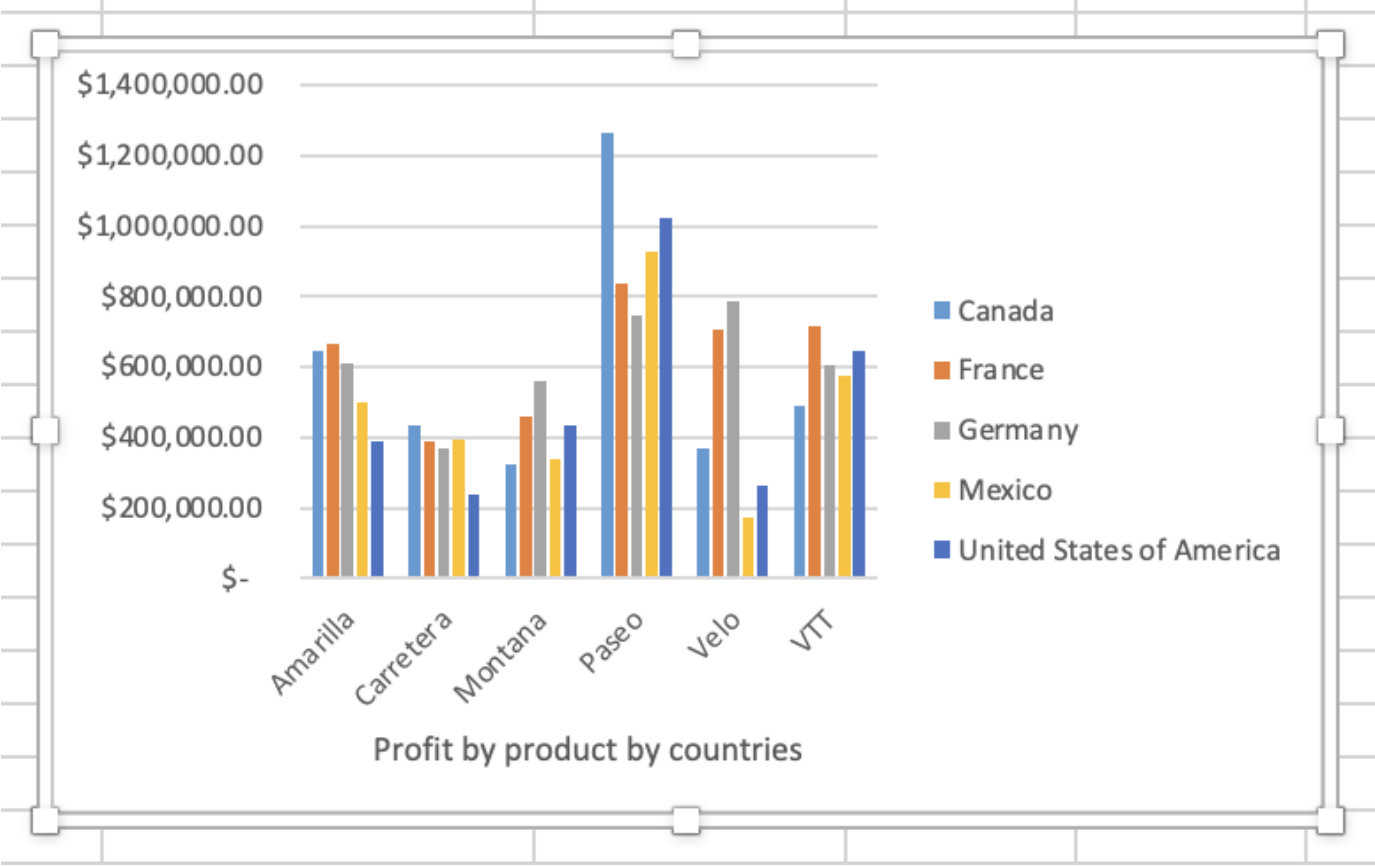

Business question

Which products generated the most profit?

Finding

Paseo generated the most profit overall and led in most countries. Amarilla was slightly higher in Canada.

Supporting visualization: Profit by product by country

Submission Item 5: CRISP-DM Reflection

Question 7

Business Understanding

I used the business question, 'Which countries generated the most sales for Montana and Paseo?' to define what the analysis should compare and which measure to use. This could help the business decide where to focus sales efforts for those products.

Data Understanding

I explored the workbook's Sales, Country, Product, and Date data using PivotTables and charts. This helped me see how sales varied by country and product and identify July as the highest-sales month for the United States in 2014.
